SKILLS

Languages	JavaScript, TypeScript
Frontend	React.js, Next.js, Redux, Context API, Tailwind CSS, React Query
Backend	Node.js, Express.js, NestJS, GraphQL, REST APIs, tRPC, WebSockets
Databases	PostgreSQL, MongoDB, DynamoDB, Redis, pgvector
Cloud & DevOps	AWS (S3, Lambda, DynamoDB), Docker, CI/CD, Render, Vercel
Architecture	Microservices, Event-Driven (RabbitMQ), Nx Monorepo
Tools	Git, Postman, JMeter, Jira, ClickUp, Sequelize, Mongoose, TypeORM
AI Integration	Claude API, OpenAI API, Gemini Flash API, Vector Embeddings (pgvector)

EXPERIENCE

Upsquere — Feb 2026 – Present

Software Engineer | Ahmedabad, Gujarat

SMG (Sway Me Good) – Influencer Marketing Platform

Node.js, tRPC, GraphQL, AWS Lambda, DynamoDB, Nx Monorepo, Claude/OpenAI API

- Contributed to an **Nx monorepo of 25 microservices**; built two new services end to end – *Loyalty* (26 APIs: accrual, redemption, tier management) and *Campaign-Auth-Score*.
- Built an **AI authenticity scoring engine** using **Claude/OpenAI API** that quantifies influencer-to-campaign fit, reducing manual shortlisting effort for brand teams.
- Implemented scoring jobs on **AWS Lambda** with results persisted in **DynamoDB** for low-latency retrieval.

VERSYS – Compliance & Document Management System

Node.js, Express, Claude Sonnet, Puppeteer, AWS S3, React, React Query, Tailwind CSS

- Built a portal centralising project/site records, worker lists, certificates, and compliance status flags across multiple sites.
- Engineered an **AI document pipeline** combining **Salus API** with **Claude Sonnet** to auto-generate SSSP, EMP, and PHA documents; rendered to PDF via **Puppeteer**, stored on **AWS S3**.
- Added a **certification expiry flagging system** with colour-coded indicators; **React Query** caching eliminated redundant API calls across dashboard views.

Spinoto – Mechanic Booking App (Admin Panel & Landing Page)

React, Next.js, Tailwind CSS

- Delivered frontend for admin panel and public landing page; **led two junior developers**, reviewed PRs, and owned the release cycle end to end.
- Resolved backlog of bugs and UI issues across both interfaces, bringing the product to a stable production release.

SignPe – Payments Platform Backend

NestJS, PostgreSQL, TypeORM

- Designed **RBAC** with a normalised PostgreSQL schema (roles, permissions, role-permission mapping) for scalable access management.
- Built reusable **NestJS guards and decorators** (`@Roles()`, `@Permissions()`) for declarative, fine-grained access control across all API routes.

Meditab Software **Dec 2022 – Jan 2026**
Programmer Analyst | Ahmedabad, Gujarat

- Developed and maintained internal **MERN-based web applications** supporting QA automation workflows across multiple teams.
- Built three Employee Management Portal modules – **Flatmate** (room-sharing), **Wall of Fame** (peer recognition), and **Birthday Board** (team celebrations) – using **Node.js, Express, PostgreSQL, and React**.
- Integrated **Socket.io** for real-time tracking of automation script progress and live activity feeds.
- Improved database throughput via **Sequelize connection pooling** and query optimisation; reduced re-renders using **React.memo** and **useCallback**.
- Applied **Worker Threads** to offload CPU-heavy operations; benchmarked API performance under load using **JMeter**.

Codient Tech **May 2022 – Oct 2022**
Full-Stack Developer | Remote

Dausto – E-Commerce Platform
TypeScript, Express, MongoDB, React + Vite (Admin), Next.js (Storefront), Formik, Zod, MSG91

- Delivered core modules – Dashboard, SEO Management, Orders, Testimonials, and Wishlist – across React + Vite admin and Next.js storefront with TypeScript + Express + MongoDB backend.
- Implemented **Formik + Zod** form validation and **MSG91 API** for OTP-based authentication and SMS notifications.
- Worked in a 6-member agile team using **Jira** and **ClickUp**; contributed fixes across product, brand, and wishlist modules.

PERSONAL PROJECTS

SkillBridge – AI-Powered Skill Exchange Platform
NestJS, Next.js, GraphQL, PostgreSQL, pgvector, Redis, RabbitMQ, WebSocket, Gemini API, Render, Vercel

- Platform where users trade skills instead of money; built as a **modular NestJS monolith** with **GraphQL subscriptions** and **Google OAuth**.
- **Semantic skill matching** via **Gemini text-embedding-004 + pgvector** cosine similarity – matches by meaning, not keywords.
- Real-time session chat via **WebSocket + Redis pub/sub**, scalable across instances; async workflows via **RabbitMQ** with dead-letter queue.
- AI session summaries generated by **Gemini Flash** and streamed via **SSE**; deployed at **$0/month** on Render + Vercel + Neon + Upstash.

PulseBoard – AI-Powered Developer Observability Platform
NestJS Microservices, Next.js, MongoDB, PostgreSQL, Redis, RabbitMQ, SSE, Gemini API

- Free Datadog alternative – correlates downtime with **GitHub commits** and error logs; generates an **AI incident report** with root cause and fix via **Gemini Flash**.
- **4-service NestJS monorepo** (API Gateway, Poller, Ingestor, Alert-SRE) with **RabbitMQ** – Poller continues uninterrupted if Alert service restarts.
- **Semantic log search** via Google Embeddings + **MongoDB Atlas Vector Search (HNSW)**; **Redis SETNX** debounce ensures exactly one alert fires per outage.

EDUCATION

Parul Institute of Technology 2019 – 2023
B.Tech in Computer Science and Engineering CGPA: 8.2
